**Policy 112
Idle Service/Line Retention**

SUBJECT:

Idle Services/Line Retention.

POLICY:

When service is made available by the cooperative, the member shall have the responsibility for using and paying for the service.

If a member wants to retain service without it being energized, the member will be charged 75% of the monthly minimum account charges under its previous rate classification. MYEC will bill this amount on a monthly basis and the member shall be responsible for this amount.

In the event the member disconnects an available service and it is disconnected for 180 days or longer, the cooperative retains the right to remove the material and equipment which provides service to the disconnected location, with or without permission of the member. Reasonable efforts will be made to contact the member prior to removal.

If at a later date, the member desires service to be restored at the same service location, the request will be treated as a new service and the member shall be required to pay the full cost of construction to install the service.

RESPONSIBILITY:

Operations Department

PROCEDURE:

If the terms and conditions in this policy are not met by the member, MYEC reserves the right to remove all of the affected service.
